Automatic control	Motor, motor with an emergency opening, remote control, wind sensor

0°- 85° Installation to the wall 0°- 85° Installation to the ceiling

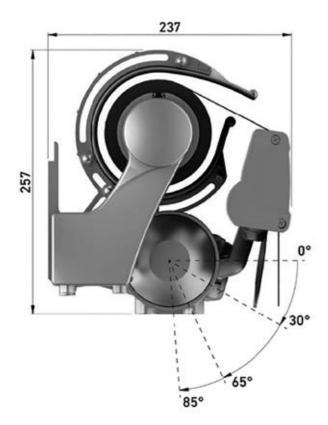

SPECIFICATIONS

The exceptionally sturdy SUNNA awning is a combination of elegance and durability. It is the perfect solution for larger terraces and commercial buildings. This awning is a great fit for cafes, while also protecting private terraces from sunlight and curious glances of passers-by.

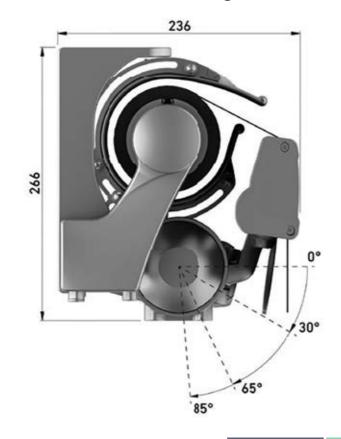

Precisely manufactured elbow connectors and the chains that connect them ensure the awning's durability and seamless operation. The construction is easy to assemble and powder-coated, making it resistant to scratches and corrosion.

You can choose from a white, silver, brown or anthracite construction.

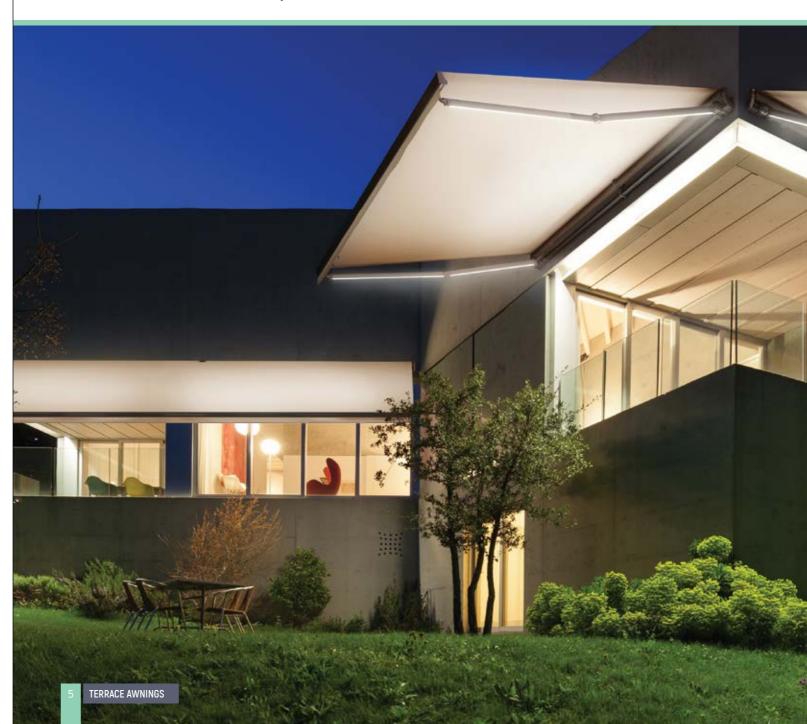

Installation to the wall

Installation to the ceiling

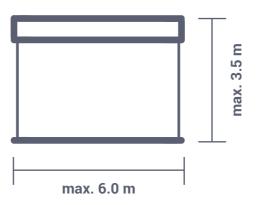

- Custom-made in Lithuania.
- Maximum width 7 m, maximum depth 3.5 m.
- The construction is durable and formed from aluminium.
- Technical components (stainless steel bolts, profile ends) are additionally protected with plastic caps; therefore, dust do not accumulate and insects and arachnids do not stay on the awning, not at this particular time.
- Aluminium arms are connected by a chain at hinges, so such a construction is extremely durable. Vibration-absorbing rubbers are used at the joints.
- Installing the awning is a rather simple process, while a lateral drainage system facilitates its maintenance.
- The awning can be installed to the wall or ceiling.
- Possibility to adjust the angle of inclination.
- Possibility to choose automatic or manual control.
- Wide choice of additional accessories (motor with an emergency opening, remote control, wind sensor).

AWNING APOLLO

T 1	
Technical data	
Colour	White, silver, brown, anthracite
Electric drive	YES
Manual drive	YES

Arms	Bending arms with a chain
Manual control	Available length of the crank: 1.6 m
Automatic control	Motor, motor with an emergency opening, remote control, wind sensor

0°- 65° Installation to the wall 0°- 65° Installation to the ceiling

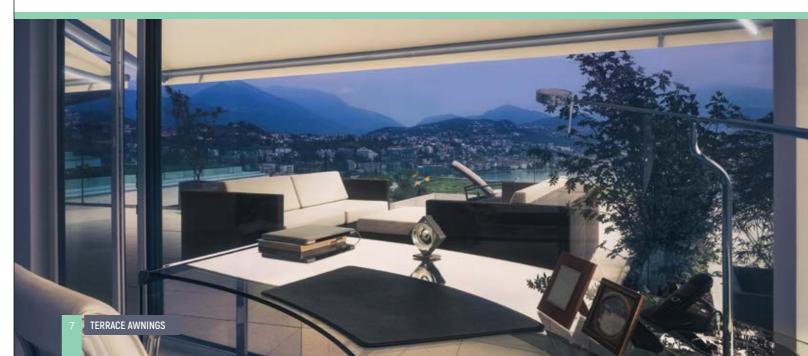

SPECIFICATIONS

The semi-cassette terrace awning APOLLO is characterized by its sturdiness and sophisticated design. Its parts are made from a special aluminum alloy, and the mechanisms are powder-coated, so the parts have a smooth, resistant coating that protects the surface.

The APOLLO awning has many excellent features, one of them being an elegant valance that provides additional protection from low-lying sun. The awning is easy to assemble. By installing additional wind sensors, you can ensure that the awning will remain safe even on windy days.

4 construction colors are available: white, silver, brown and anthracite.

- Custom-made in Lithuania.
- Maximum width 6 m, maximum depth 3.5 m.
- Aluminium arms are connected by a chain at hinges, so such a construction is extremely durable. Vibration-absorbing rubbers are used at the joints.
- With a valance which in turn protects from sunlight and provides elegance.
- The awning can be installed to the wall or ceiling.
- Possibility to adjust the angle of inclination, choose automatic or manual control
- By choosing an electric drive, the awning can be easily controlled.
- Wide choice of additional accessories (motor with an emergency opening, remote control, wind sensor).

- Aluminium arms are connected by a chain at hinges, so such a construction is extremely durable. Vibration-absorbing rubbers are used at the joints.
- The awning can be installed to the wall or ceiling.
- Possibility to adjust the angle of inclination, choose automatic or manual control
- · Possibility to adjust the angle of inclination.

3°- 72° Installation to the wall 4,5°- 78° Installation to the ceiling

SPECIFICATIONS

Terrace awning HELIOS is a reliable solar control system for those seeking durability. Due to its closed cassette, this awning can be installed anywhere, regardless of whether the area protected from environmental factors. The cassette protects the fabric from rain, snow, and dirt.

By installing an additional wind sensor, the awning will adapt to changing wind speed and retract on its own if necessary. A wide variety of additional accessories such as a motor with emergency opening, remote control and wind sensor will help you take full advantage of this awning.

4 construction colors are available: white, silver, brown and anthracite.

There is a choise of LED lighting in elbows.

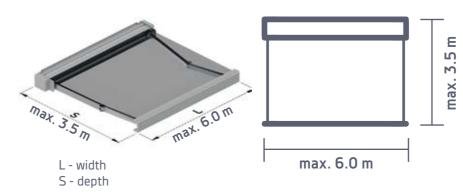

AWNING ARINNA

Sustainable design of the fabrics reflects the philosophy of life of our generation, which is to preserve nature for future generations, take care of not only ourselves but also the environment we live in.

We have indeed supplemented the standard fabric collection crafted in Lithuania with exclusive fabrics. This line of fabrics is for those who love nature and with each their choice want to contribute to a cleaner world.

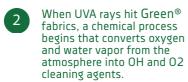

A WORLDWIDE INNOVATION

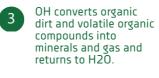

THE FIRST FABRIC TO PURIFY THE AIR

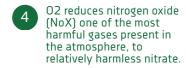

For the first terrace awnings made in Lithuania!

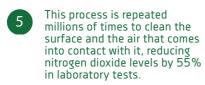

Fabrics that clean and purify air by photocatalysis. Remove contaminants, have a self-cleaning and mould-reducing effect. Save time, money, water, chemicals and energy.
